What is Culture

- When a group of people share the same values, beliefs, and practices
- May be centered on attributes such as age, community, economic status, education, gender, race, religion and sexual orientation
- Our culture is one of many, when we recognize this we are on the road to Cultural Humility

16 |

Cultural Competence vs. Cultural Humility

Cultural Competence

- Builds an understanding of cultures
- Supports the idea that someone can be “competent” in a culture not their own
- People strive to obtain goals

Cultural Humility

- Encourages personal reflection to increase awareness
- Values introspection
- No end result
- Encourages learning with no end goal, but with an appreciation of growth and understanding.

17 |

What is Cultural Sensitivity

- The knowledge and interpersonal skills that allows us to understand, appreciate, and work with individuals from cultures other than our own.
- It involves an awareness of cultural difference, self-awareness, knowledge of someone's culture, and adaptation of skills.

18 |

Cultural Awareness

- ❑ To be culturally aware is to maintain the attitudes, skills, behaviors, and policies that will allow organizations to provide superior service to their members and to each other
- ❑ Our actions and our attitudes drive the perceptions of others around us, and the communities we serve

Diversity

“An instance or condition of having or being composed of differing elements or qualities”

-Merriam-Webster-

The existence of a variety of cultural groups within a society

Diversity is not only being **aware or sensitive** to cultural and individual differences but also having the **knowledge, skills, and attitudes** to effectively, appropriately and respectfully interact with individuals from any cultural or individual backgrounds.

Why Diversity

Promotes individuality as a society

- Increases creativity and alternative approaches to problem solving

Builds a strong brand

- Optimizes our ability to provide superior service to the communities we serve

Encourages personal growth and development

21 |

Cultural Humility

- Encourages personal reflection to increase awareness
- Values introspection
- No end result
- Encourages learning with no end goal
- No one culture is above or below another in value, just different

24 |

Best Practices

- Don't make assumptions about the person
- Observe and attempt to mirror interactions
- Patience
- Don't be afraid to ask questions
- Be concise in interactions
- Speak more clearly and slowly, not louder
- Avoid jargon, slang and acronyms
